

Advanced Knowledge Graph

Ask complex questions about companies, relationships, events, and financial data

 18265 entities • 54608 relationships • 2 types

Welcome to the Advanced Knowledge Graph Query System!

I can understand complex questions about your financial knowledge graph using advanced NLP. Try asking about relationships, comparisons, events, or network analysis.

 Try these advanced questions:

Compare Apple and Microsoft partnerships

Most influential companies in network

M&A events with financial impact

Investment relationships and values

Complex competitor-partner relationships

Tesla events with market impact

Show me all merger and acquisition events with financial impact

Ask any complex question about the knowledge graph...
